Improving the Usability + Quality of Clinical Data for Payers

The IMAT Data-as-a-Service (DaaS) *offering provides access to clean and validated data, allowing health payers to gain optimal results from their data, while also removing any challenges with meeting new standards.*
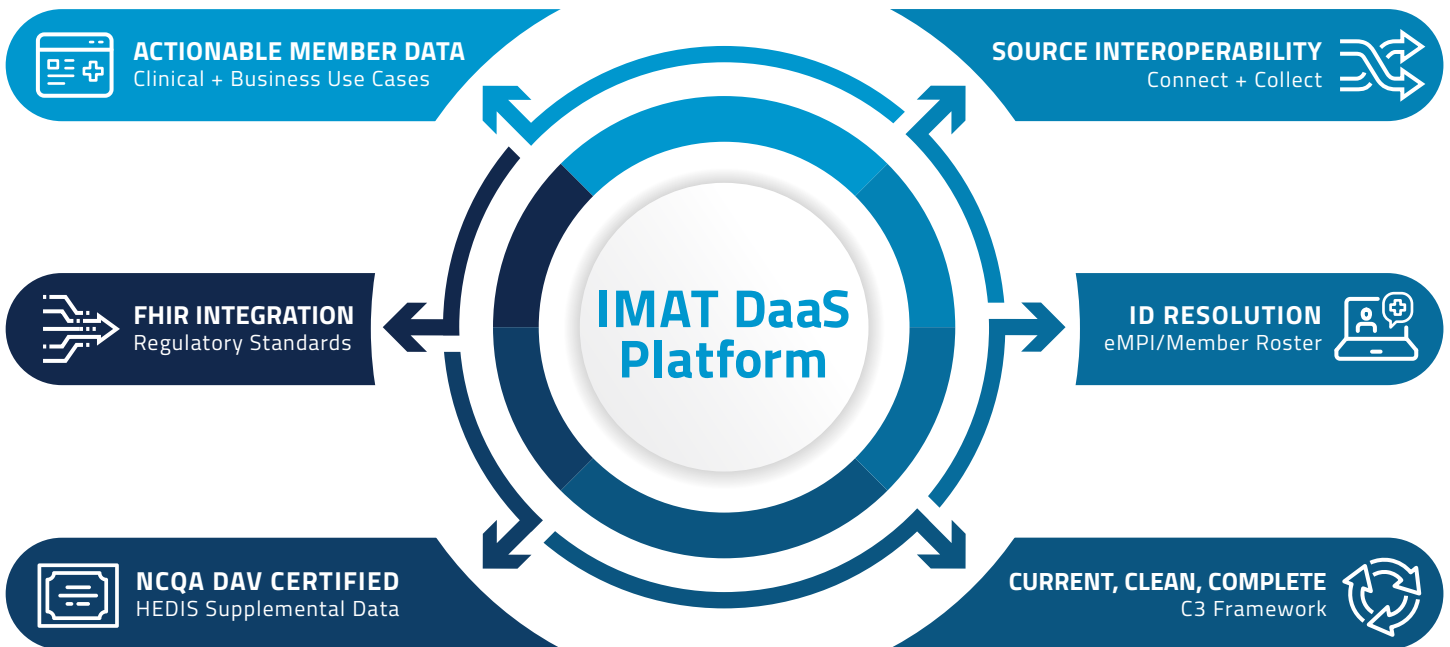

With the goal of providing access to actionable, clean and validated data, the IMAT DaaS offering allows health payers to gain optimal results from their data, while also removing any challenges with meeting new standards.

As a one-stop-shop offering of technology and proven services, the new DaaS offering meets the new Centers for Medicare and Medicaid Services (CMS) efforts to transition all quality measures used in its reporting programs to digital quality measures (dQMs). It also improves overall HEDIS reporting capabilities and STAR ratings.

Leveraging the IMAT C3 Framework, the IMAT DaaS offering takes the unclean, incomplete, raw clinical data that comes out of the EHR eco-system and dramatically improves the overall data quality.

360° APPROACH TO ENHANCING DATA QUALITY + INTEROPERABILITY

This comprehensive solution provides a 360-degree approach to enhancing data quality and interoperability:

ACTIONABLE MEMBER DATA
Clinical + Business Use Cases

SOURCE INTEROPERABILITY
Connect + Collect

FHIR INTEGRATION
Regulatory Standards

IMAT DaaS Platform

ID RESOLUTION
eMPI/Member Roster

NCQA DAV CERTIFIED
HEDIS Supplemental Data

CURRENT, CLEAN, COMPLETE
C3 Framework

OUTCOMES BEYOND DATA QUALITY

In addition to improving overall clinical data quality, the IMAT DaaS offering helps payers to:

- Eliminate the burden of chart chasing
- Prioritize member outreach
- Improve risk adherence
- Inform risk triangulation
- Achieve early detection for managed care
- Access detailed patient trends insights

With the IMAT C3 Framework guiding the technology behind the DaaS platform, payers can:

- **Leverage the IMAT's Data Aggregator Validation (DAV) capabilities** for accessing comprehensive supplemental data, and supporting risk assessment accuracy and quality parameters.

- **Support Fast Healthcare Interoperability Resources (FHIR) capabilities** by ingesting all patient data and converting it into FHIR-based records — removing the burden from payers to fund and implement the required interoperability.

- **Enable clinical and business use cases that truly matter** by ensuring that the data is current, undergoes the required data quality improvements, as well as is valid for use cases.

- **Take advantage of Prospective/Retrospective Intervention Value** that covers early identification and case management, supports quality measures and offers advanced risk analysis.

- **Easily index and search all clinical data with IMAT Solutions Perfect Search** indexing and query engine that can combine relevance ranked, full text, Boolean, meta data, and field searches including text, date and time.

ABOUT IMAT SOLUTIONS

IMAT Solutions are experts in health data acquisition and normalization, supporting programs for HEDIS, STARS, Population Risk Management, Data Aggregator Validation (DAV), Primary Care First, 21st Century Cures Act and CMS Interoperability. The company offers turnkey, end-to-end services — from data source onboarding to data normalization validation to data quality management to reporting and beyond.

IMAT Solutions pioneered the C3 Framework to help payers achieve true data confidence for enhancing all care, reporting, financial, and compliance efforts. With the dramatic rise in the amount of health-related data that is often untimely, incomplete, and inaccurate, the C3 Framework tackles this issue by ensuring all data is Clean (C1), Current (C2) and Complete (C3).
