# IMAT SOLUTIONS

Unlocking the Power of Health Data for All

The Next Generation Health Data Intelligence Platform

IMAT Intelligence™ *is a SaaS-based data intelligence platform built to break down data silos, enhance interoperability, and deliver real-time, actionable insights for healthcare organizations of any size.*

- Drive better decisions and outcomes with comprehensive, real-time intelligence in a high-performance flexible solution designed to address your needs
- Affordable, scalable, and easy to implement—no matter what your organization's size or complexity
- Built to support Integrated Delivery Networks (IDNs), Accountable Care Organizations (ACOs), Clinically Integrated Networks (CINs), Provider Networks (PNs), Independent Physician Associations (IPAs), Community Information Exchanges (CIEs), and Health Payers

COMPREHENSIVE INTELLIGENCE FOR MODERN HEALTHCARE

Four Dimensions of Intelligence:

BUSINESS INTELLIGENCE:
Real-time analytics and predictive insights for data-driven decisions

DATA INTELLIGENCE:
Advanced transparency, data quality and interoperability across disparate EHRs and data sources

SECURITY INTELLIGENCE:
HIPAA-compliant safeguards, proactive monitoring with HITRUST, SOC and ISO-certified environments for secure collaboration

ARTIFICIAL INTELLIGENCE:
Unlocks insights from structured and unstructured data (e.g., clinical notes) to enhance care coordination and predictive analytics

Key Features & Benefits

- **Scalable Architecture:** Effortlessly manage small to large, fast-growing datasets and adapt to changing needs

- **Modular Pricing:** Pay only for the features that address your current needs while providing a cost-effective expansion path.

- **Turnkey Implementation:** Rapid deployment and speed to value with pre-configured dashboards, reports, and compliance tools

- **Embedded BI Tools:** Leverage the BI toolset that equips users with the tools to create, modify, and customize dashboards and reports on the fly for faster, smarter clinical decisions

- **Seamless Interoperability:** Aggregate and normalize data from multiple sources, eliminating silos and ensuring unified patient records

- **Advanced Searchability:** Index and analyze both structured and unstructured data for deeper insights

- **FHIR Interoperability:** Take advantage of IMAT's native FHIR CDR, FHIR Server and APIs to support leading edge interoperability

Solving Real Healthcare Challenges

- **Eliminate Data Silos:** Unified data repository enables coordinated care across all providers

- **Reduce Costs & Complexity:** Flexible pricing and rapid deployment, lower financial and operational barriers

- **Enhance Compliance & Security:** Built-in safeguards support regulatory requirements and secure data sharing

- **Empower All Stakeholders:** From large networks to independent practices, IMAT Intelligence levels the playing field

Experience the Future of Health Data Management

IMAT Intelligence™ delivers a powerful, flexible, and cost-effective alternative to traditional data repositories.

- Improve care outcomes with real-time analytics and predictive insights

- Aggregate, manage, and leverage data efficiently, at any scale

- Stay ahead of regulatory demands and cost pressures with a smarter solution
